Unisys understands that Government-wide acquisition contracts are becoming increasingly necessary for many agencies by reducing acquisition time and utilizing pre-selected contractors. To meet the increasing need to respond rapidly and effectively to indefinite delivery/indefinite quantity (IDIQ) task order requests, Unisys has a Government-wide Acquisition Contract (GWAC) Center that uses automated tools to ensure our IDIQ and GSA Schedule customers receive rapid, innovative, cost-effective responses to their solicitations.

Once an IDIQ task order has been awarded to Unisys, our GWAC Center continuously monitors performance and serves as the single point of contact for all IDIQ issues. The primary goal of our GWAC Center goal is to maximize

the use of IDIQ vehicles while ensuring our clients receive optimum service delivery and contractual support for every task order issued to Unisys. We use a web-based client-satisfaction tool to periodically survey our customers to ensure their satisfaction with Unisys services.

Through our GWAC Center, our customers have access to more than 31,000 Unisys personnel worldwide, plus facilities and resources in all 50 states and over 100 countries. To support the growth of our IDIQ contracts, the GWAC Center can access a global sales force of 455 sales professionals who use Siebel tools to focus on increasing business worldwide.
